Education

Massachusetts Institute of Technology — Cambridge, MA
B.S. Candidate — Sep. 2025 – Present

- Major: Electrical Engineering with Computing; GPA: 5.0/5.0
- Relevant Coursework: Real Analysis, Computation Structures, AI Inference, Introductory Control

Research

MIT CSAIL Spoken Language Systems Group — Cambridge, MA
Undergraduate Researcher — Jan. 2026 – Present

- **Cheng-Kuang Chang***, Kai-Wei Chang*, Alexander H. Liu, James Glass. *Overcoming State Inertia in Full-Duplex Spoken Language Models via Activation Steering* . (**NeurIPS 2026**).

MIT CSAIL Data Systems Group — Cambridge, MA
Undergraduate Researcher — Sep. 2025 – Jan. 2026

- *Advisors: James Moore and Prof. Tim Kraska.* Designed and implemented a scalable evaluation framework for LLM-generated code using isolated execution environments and automated quantitative metrics for reproducible evaluation.

Awards

- **Gold Medal**, International Physics Olympiad (IPhO) — Jul. 2023
- **Gold Medal**, Asian Physics Olympiad (APhO) — May 2023
- **First Prize**, National Physics Competition — Dec. 2023

Projects

Pengunix: Hobby x86 Operating System
C, x86 Assembly — Jun. 2025 – Aug. 2025

- Built a custom x86 microkernel operating system from scratch in C and x86 Assembly.
- Implemented low-latency inter-process communication, memory management, and multiprocessing support.

Experience

MIT 6.191 Computation Structures — Cambridge, MA
Lab Assistant — Spring 2026

- Mentored students on pipelined processor design, operating-system components, and hardware/software debugging.

R.O.C. Marine Corps — Taiwan
Private, Communications Specialist — Jun. 2024 – Jun. 2025

- Supported reliable operation of military communication equipment and procedures.

Academic Service

- Reviewer, IEEE Spoken Language Technology Workshop (SLT) — 2026

Skills

Programming: C, Python, Assembly, Verilog

Systems/ML: Linux, Git, PyTorch, OS internals, computer architecture, signal processing, speech modeling

Languages: English, Mandarin Chinese
